2. Updated features

2.1. High risk contact command

A new command is now available:

/prescriptionCodes/commands/highRiskContactPrescriptionCodeCreationRequest

This command allow to send a request for prescription code(s) for reason high risk contact.

This will not directly create code(s) right away but the system will analyze the covid situation of the patient (vaccination status and contamination in the last 180 days) in order to create 0, 1 or 2 CTPC code(s) a few minutes later.

For now, the codes created through this command are not visible in the collectivity tool.
