# 1. Release

<b>RELEASE NUMBER</b>	<b>2.5.0</b>	
<b>TYPE</b>		<b>URGENT</b>
<b>APPLICATION</b>	Corona Test Prescription & Consultation	
<b>VERSION</b>		
<b>DATE ACCEPTATION</b>	30/11/2020	
<b>DATE PRODUCTION</b>	02/12/2020	

## 2. Bug fix

- Check on « sample ID format » works now on browsers Edge and Internet Explorer.
- A Test request on behalf of a community with the reason “High Risk contact” is allowed regardless of whether a positive result exists for the index patient within 12 days.

## 3. New features

### 3.1. Test Prescription request

- When requesting a test prescription, you can now indicate if the patient works as a “health professional” or a “health professional for the elderly”.

**CORONA**

## 3.2. Sampling & Antigen test

- During the sampling request, you must select the “Test Type” and one of the “sample type” associated

The screenshot shows a web form for a sampling request. At the top, there are two light blue boxes: "Date de création" and "Type de test prescrit". Below these, the form fields are as follows:

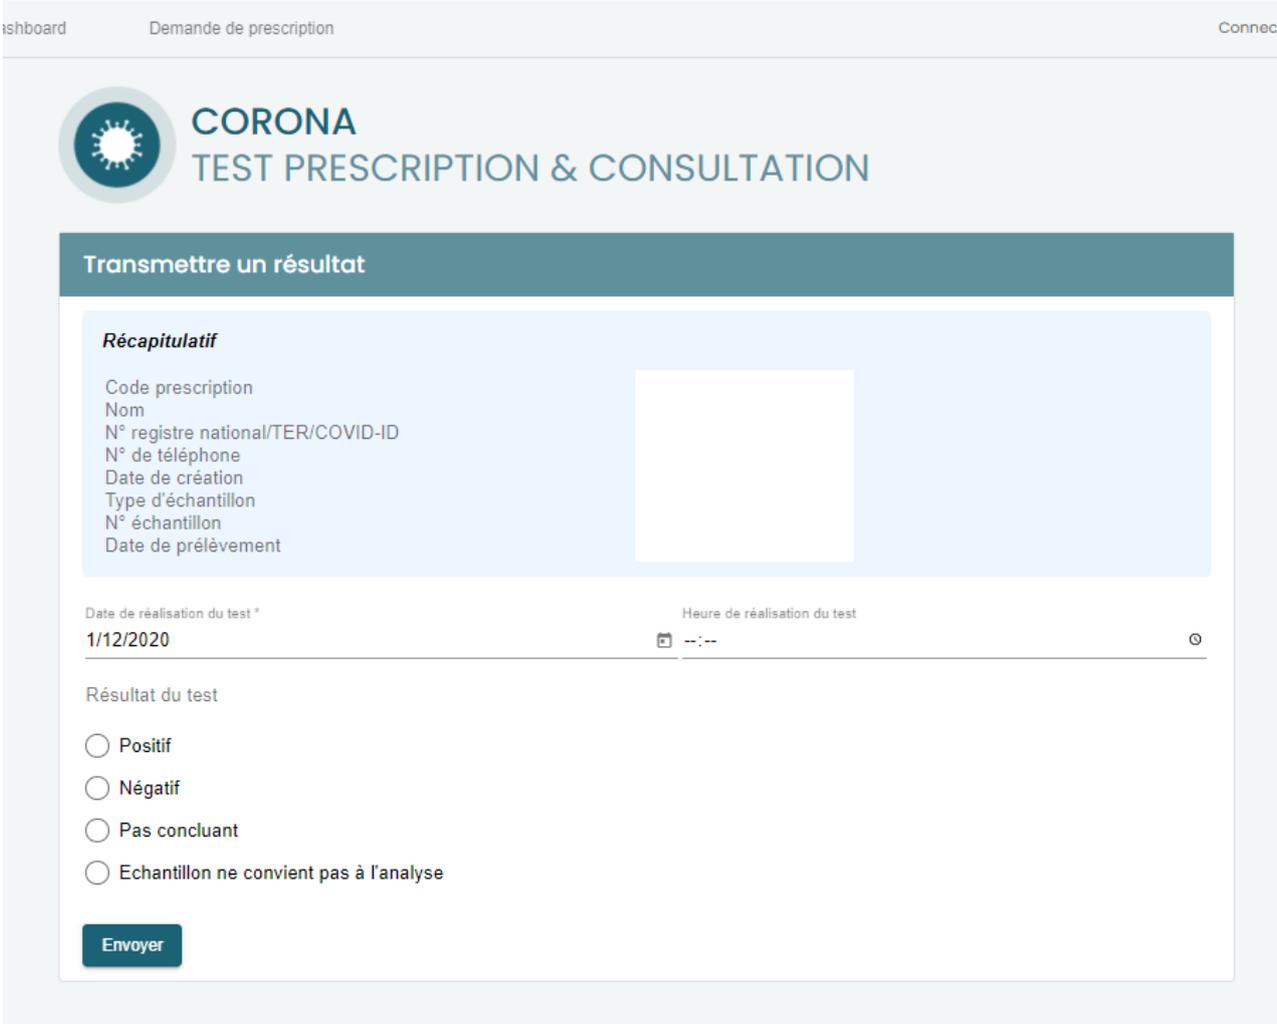

- N° d'échantillon \***: A red asterisk indicates this is a required field. The value entered is "1/12/2020".
- Date de prélèvement \***: The value entered is "1/12/2020".
- Heure du prélèvement \***: The value entered is "--:--".
- Champ obligatoire**: A checkbox labeled "Je ne dispose pas d'un numéro d'échantillon" is unchecked.
- Type de test \***: A dropdown menu is open, showing "Test antigénique rapide" selected.
- Type d'échantillon \***: A dropdown menu is open, showing "Frottis oropharyngé" selected.
- Lieu d'analyse**: A dropdown menu is open, showing "Sur place (test rapide)" selected.
- Introductory checkbox**: A checked checkbox labeled "Introduire le résultat immédiatement".
- Envoyer**: A blue button at the bottom left.

- An error message is now displayed If the laboratory selected for the analysis does not have an ETK number, it is not possible to carry out the analysis via this lab.
- When the following “Test type” is selected : “Rapid Antigen test”, you can enter the result immediately after the sampling request.

### 3.3. Submit a result

For now on, in the “submit result” form, you can send yourself the result of a Rapid test via the application by filling in the following data :

- Date of test completion
- Time of test completion
- Test result
  - Positive
  - Negative
  - Not conclusive
  - Sample is not suitable for analyses

The screenshot shows a web application interface for submitting a COVID-19 test result. At the top, there is a navigation bar with "Dashboard" and "Demande de prescription" on the left, and "Connec" on the right. Below this is a header for "CORONA TEST PRESCRIPTION & CONSULTATION" with a circular logo on the left. The main content area is titled "Transmettre un résultat" and contains a "Récapitulatif" section with a list of fields: Code prescription, Nom, N° registre national/TER/COVID-ID, N° de téléphone, Date de création, Type d'échantillon, N° échantillon, and Date de prélèvement. To the right of this list is a large empty box. Below the recapitulation, there are two input fields: "Date de réalisation du test \*" with the value "1/12/2020" and a calendar icon, and "Heure de réalisation du test" with a time selection icon. Underneath these is a "Résultat du test" section with four radio button options: "Positif", "Négatif", "Pas concluant", and "Echantillon ne convient pas à l'analyse". At the bottom left of the form is a blue "Envoyer" button.

## 3.4. Dashboard

### 3.5. User Access

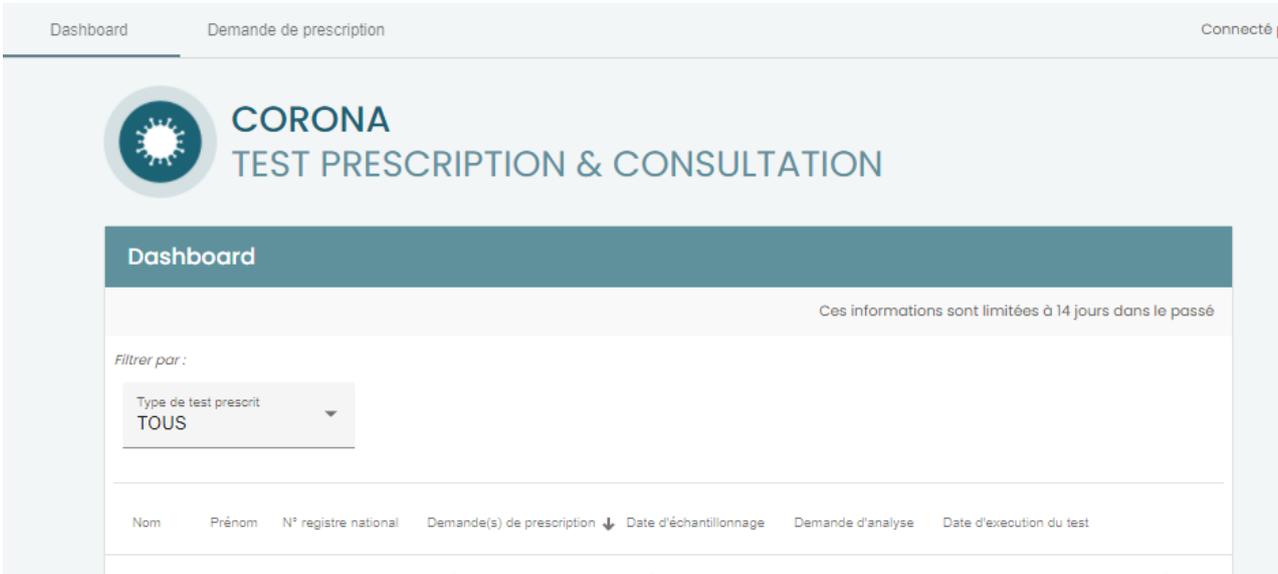

- The dashboard is now accessible both by mandated citizen and by doctor
  - At the end of a prescription request, you will automatically be redirected to the dashboard
- The mandated citizen has access the same functions as the doctor, but he/she will not be able to see medical data such as :
  - Date of test completion
  - The test result
  - The reason of the test (in dashboard detail)

### 3.6. Filters on dashboard

To make easier the search of the result, you can now filter the dashboard by “Prescription Test type”

### 3.7. New data in Dashboard table

- Date of prescription request
- Date of sampling
- Date of test completion and test result

Dashboard Demande de prescription Connecté

### 3.8. New buttons in dashboard detail

- In the details of the dashboard you can now add a sample to a prescription request with the button “sampling”. In the sampling, you have the choice to request an analysis to a laboratory or to submit the results in case of a rapid test.
- In the details of the dashboard, you can now add a test result to a sampling with the button “submit a result”
  - If the result has already been transmitted, the message “*result already transmitted*” is displayed.
