| DATE PRODUCTION | 09/12/2020 | |

# 2. New features

## 2.1. Rapid Test Result are now available

The available "Rapid test results" are now displayed in the dashboard.

- If the result is negative, the message will be "Negative – Rapid Test"
- If the result is positive the message will be "Positive"

## 2.2. Inconclusive or Unsatisfactory test results are now displayed

Now the app displays on the dashboard a user feedback when test results are "inconclusive" or "unsatisfactory"

## 2.3. Test results are available in the app more quickly

We worked on a new method of retrieving test results in the application. This improvement allows the results to be displayed more quickly (as soon as the laboratory transmits the information to Sciensano).

We have also improved the performance of the results display time.

## 2.4. The tab "dashboard" becomes "Patient of : *Organization*"

- Modification of the title of the tab
- The content displayed under this tab remains the same as currently → all the requests filtered by organisation

ion 1.1

## 2.5.   New tab "My patients"

- From now on, Doctor can find under the new tab "My patients"
  - all the requests he/she has made
  - regardless of the collectivity / company selected

## 2.6.   New filters for dashboard requests

In this release, the dashboard data can now be filtered on the following filters:
- Patient's name
- Patient's first name
- Patient's National Register Number

We have removed the filter "Test Type" for reasons of inefficiency

## 2.7.   Organization is visible inside the details

In a patient's details, the organization related to the prescription request is now displayed.
