

About ICT

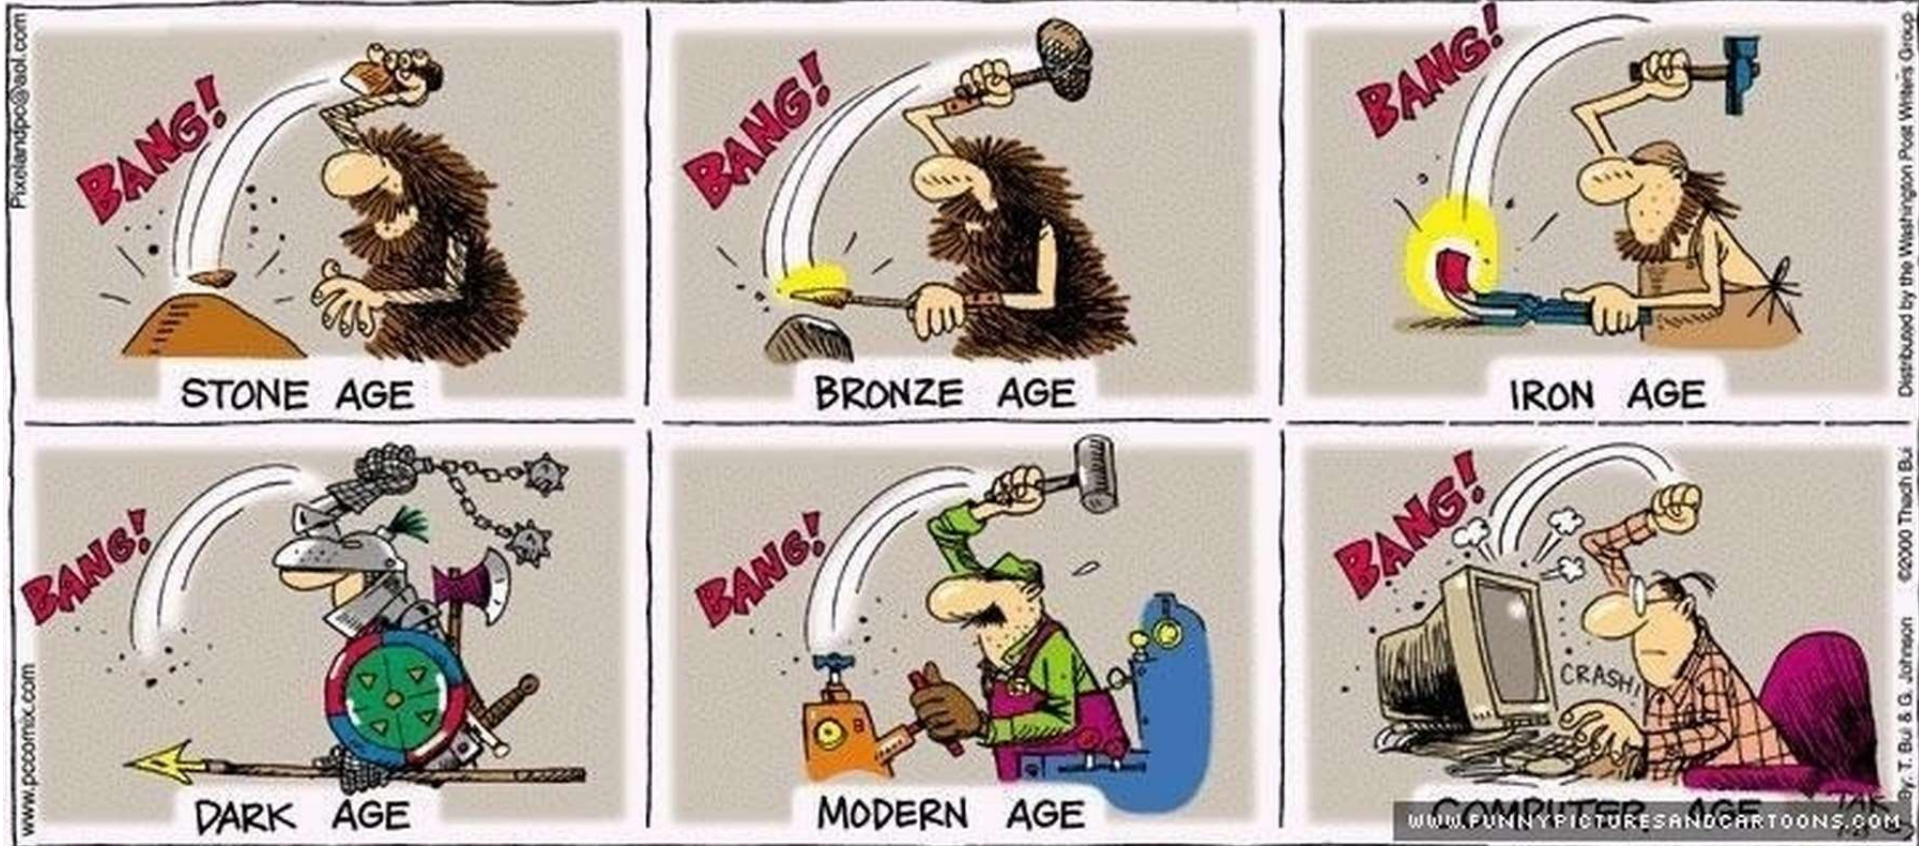

The oldest computer can apparently be traced back to Adam and Eve. And surprise of surprises: it was an Apple.

But with extremely limited memory. Just one byte.
Then everything crashed.

Somewhere, something went terribly wrong

Life before computer

- Memory was something that you lost with age
- An application was for employment
- A program was a TV show
- A cursor used profanity
- A keyboard was a piano
- A web was a spider's home
- A virus was the flu
- A CD was a bank account
- A hard drive was a long trip on the road
- A mouse pad was where a mouse lived
- And if you had a 3 ½ inch floppy
... you just hoped nobody found out
